The kilometer references are to be removed from all signposts in Hungary, - not the signposts themselves.

The concrete road between Miskole and Sajogentepeter is completed. The extension of this road to Putnok is now being built.

1. This item does not seem very probable in so far as the stone kilometer indicators are concerned, which are used extensively in all parts of Hungary.
2. Highway No. 23, which leads from Miskolc to Putnok, is not of recent construction. It is likely that the source is not referring to a new road but merely the resurfacing of No. 23 with concrete.
